DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-2, 11-16, 31-36, drawn to a composition and method of treating cancer by employing compounds of Formula IX (Genus A).

Group II, claim(s) 3-4, 11-16, and 34-36, drawn to a composition and method of treating cancer by employing compounds of Formula IX (Genus B).

Group III, claim(s) 5-6, 11-16, and 37-38, drawn to a composition and method of treating cancer by employing compounds of Formula X (Genus C).

Group IV, claim(s) 7-8, 11-16, and 34-36, drawn to a composition and method of treating cancer by employing compounds of Formula IX (Genus D)

Group V, claim(s) 9-10, 11-16, and 34-36, drawn to a composition and method of treating cancer by employing compounds of Formula IX (Genus E).

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: they are employing different subgenus of compounds with various formula. Since they employ different and patentably distinct compounds.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The various benzimidazole compounds recited in claims 2, 4, 6, 8, 10, 34-36, and 38

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

None

The following claim(s) are generic: 1-16 and 31-38.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: They are having different moieties attached to the compounds which make the resulting compounds in a different subgenus. These subgenera are patentably distinct to each other. They have different chemical properties and they belong to different chemical classifications. Therefore, the special technical features are not seen to be present herein.

Because the above restriction/election requirement is complex, a telephone call to applicant's agent to request an oral election was not made. See M.P.E.P. Sec. 812.01.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
